**Extensibility    Modularity    Scalability**

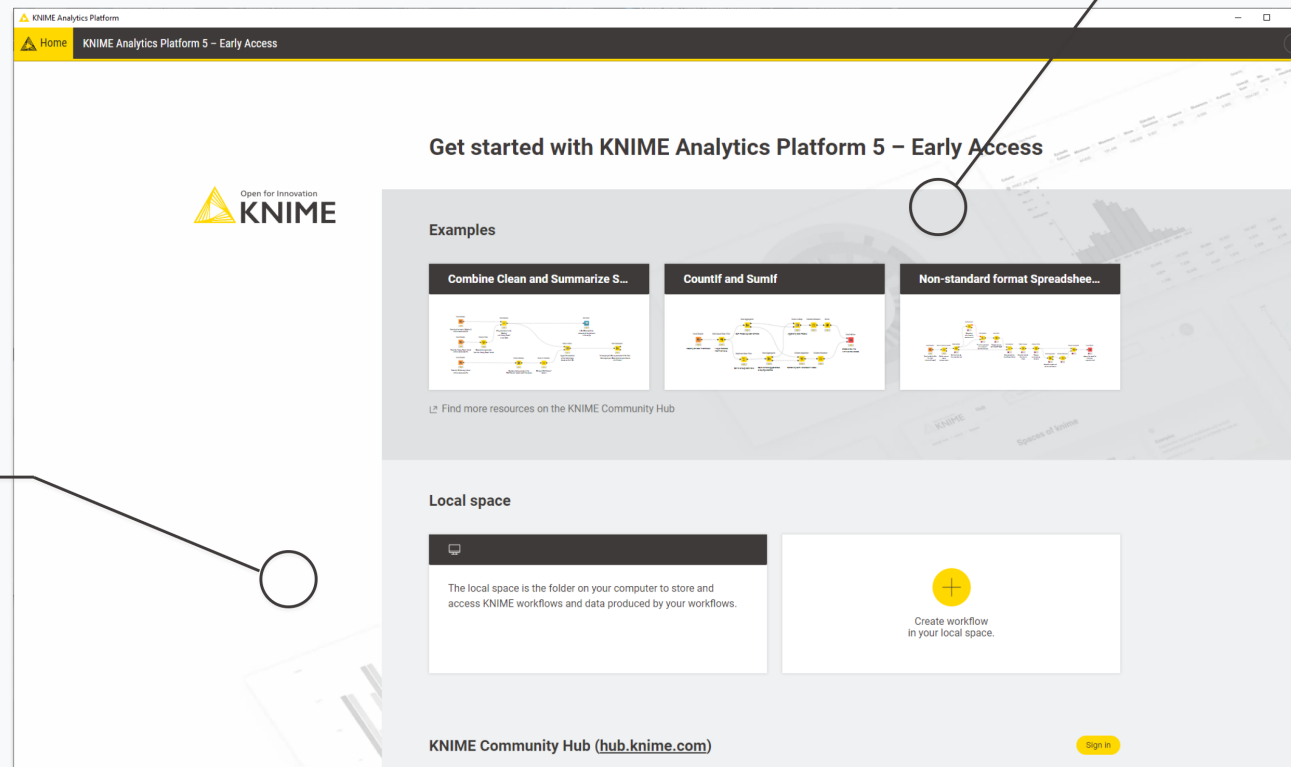

### Entry page

Create a new workflow or your local and KNIME Community Hub spaces.

### Explore examples

You can provide us feedback about the KNIME modern UI here.

## Application tabs

Entry page tab and all opened workflows tabs.

## Side panel navigation

### Description

Description of the displayed workflow or component.

### Node repository

All available nodes in KNIME Analytics Platform to build your workflows.

### Space explorer

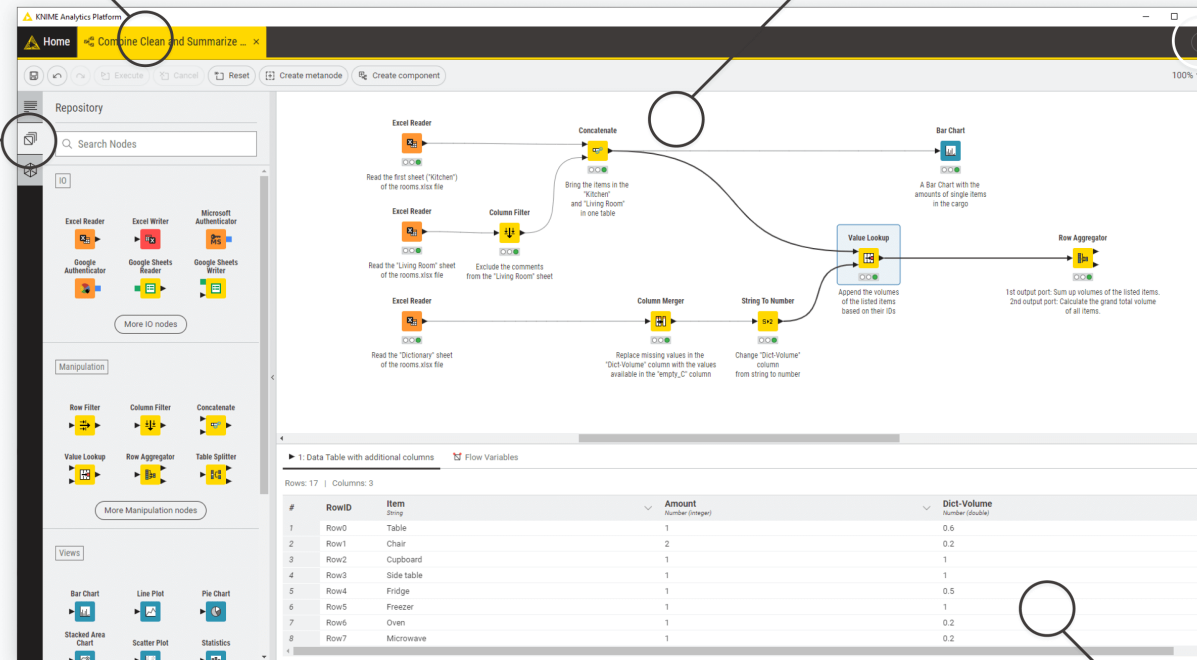

Navigate local or KNIME Hub spaces and access your workflows, components and files.

## Workflow Editor

Canvas for editing the currently active workflow.

## Info page

Access to more material, install additional extensions and change settings for the node repository.

## Node Monitor

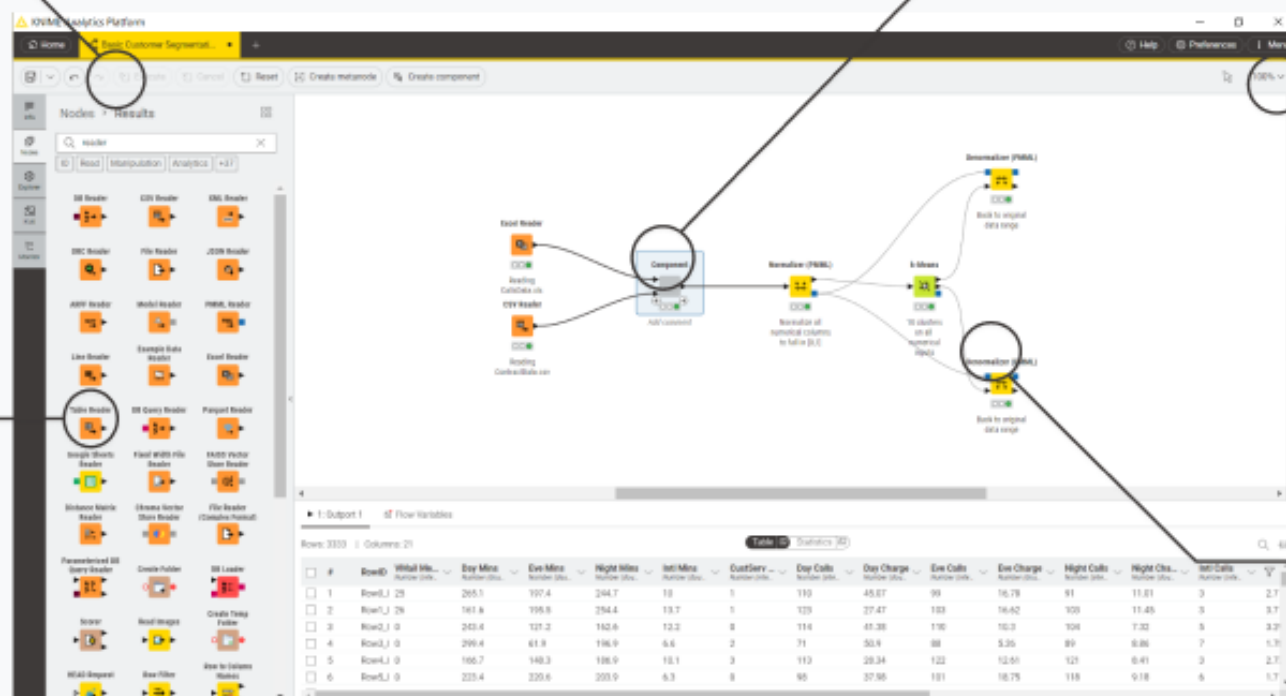

Shows the output of the current selected node and also the flow variable values.

## Workflow toolbar

Interact within the whole workflow like save, undo, redo or with actions that are applicable for the current selected nodes.

Node repository  
result

Search result of all available nodes in KNIME Analytics Platform based on your search term and chosen categories.

## Rename

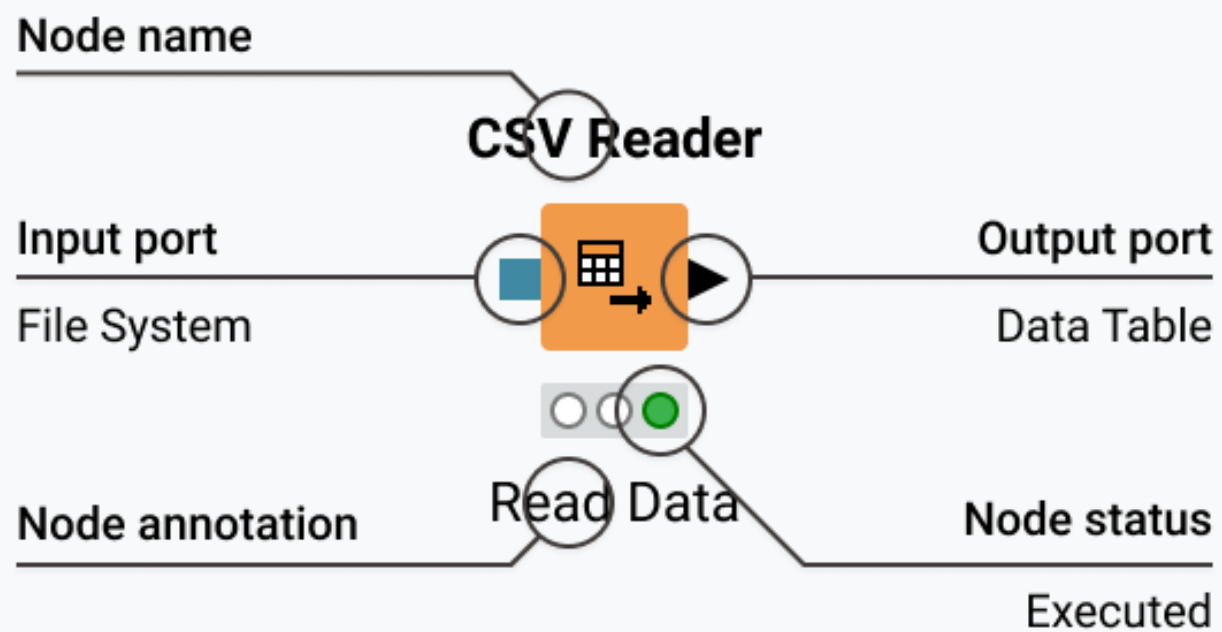

Rename metanodes  
and components  
directly at their name

## Zoom

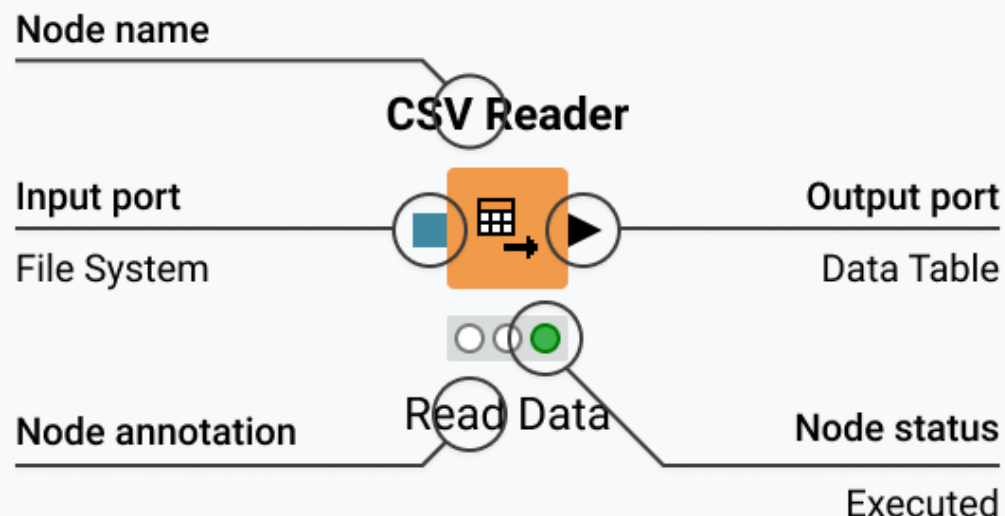

Zoom in and out  
canvas, or fit it to  
your screen.

## Node action bar

Interact directly with the node, to e.g. configure, execute a node or to open up the corresponding view.

### Not configured

The node is waiting for configuration or incoming data.

### Configured

The node has been configured correctly, and can be executed.

### Executed

The node has been successfully executed. Results may be viewed and used in downstream nodes.

### Error

The node has encountered an error during execution.
